What Everyone Should Know About Fossil Fuels (Before They Divest)

ALAN CARROLL

Professor of Geoscience
University of Wisconsin-Madison
Author of Geofuels: Energy and the Earth

Thursday, March 3, 2016
4-5 pm

University of Utah: James Talmage Bldg. (JTB) Room 310, SE corner of President’s Circle

“Our energy use and its consequences (including climate change) motivate some of the most contentious and complex public debates of our time. Although these issues are often cast in terms of renewable versus nonrenewable energy, in reality both depend on finite Earth resources. The evolution of the Earth itself therefore offers a uniquely illuminating perspective from which to evaluate alternative pathways toward energy and environmental sustainability.” (from the Geofuels book summary, Cambridge University Press)
